

May 14th 2012

Dear Mr Ikram,

I am writing this letter in appreciation of the marvellous improvement in my eyesight, following four years of eye surgery performed by you and your wonderful team at Stepping Hill Hospital. I was diagnosed with Keratoconus in 1966, and after many years of diminishing vision was eventually offered corneal grafts in the 1980s. This did improve my vision somewhat with very strong Prescription glasses. However in 2005 the problem reoccurred and I was referred to you by my G.P. in 2007. I am so grateful that you agreed to redo my grafts but during this time I also developed cataracts causing further complications. However after many visits to your clinic and much surgery, I now have The best vision I have had for Forty years and only need glasses for reading. I have therefore written this letter with the details of my History as a most grateful and respectful recommendation of the surgery and treatment received from you. Many, many thanks.

With kind Regards

Yours Sincerely

H M Clark .
